

Fax Directly to and from the Desktop!

For over three decades, we've been faxing documents and it remains an expensive technology that just doesn't fit nicely into the IP world. Until now.....

Turnkey Fax Server Connects Directly to your PBX

The FaxFinder® fax server is a turnkey solution that connects directly to your PBX. It converts faxes to a PDF or TIFF file allowing you to receive faxes wherever you are as e-mails and send faxes from any application that can print.

Delivers Faxes to Remote Offices and Field Sales People

The FaxFinder fax server delivers faxes over a WAN to the desktop of remote offices and field sales people. Once received, users can view, print or forward as another e-mail.

So, What Are You Waiting For?

Complete your unified messaging initiatives with the FaxFinder fax server. Give us a call at **888-466-8835**. Let us put Multi-Tech to work for you today!

Call Nu-TEL Communications today to learn more about distributed network faxing.
